FINANCIAL AND COMMERCIAL.

MONEY MARKET

THURSDAY, July 31-6 P. M. The stock market continues dull, but not so much depressed. Occasionally a little life is visible in some leading stock, but it is only a temporary matter, and it soon relapses again. Erie Rullroad stock has within the past day or two revived a little, and shows signs of renewed activity, but it appears to be wanting in strength. All the other railroad stocks have, once in a while, a spasmodic touch, and look for the moment as though there was going to be at last a strong natural movement, but after two or three efforts all is over, and prices fall back again to the starting point. At the first board to day Erie Railroad advanced # per cent; Galena and Chicago, #; Cleveland and Toledo, #. Michigan Southern Railroad declined 1 per cent; Cumberland, 1; Reading and New York Central opened and closed without change, but with moderate sales. There is a strong bull party in Erie, and that appears to be the only stock on the list in which there is a party for either an inflation or depression. Large lots of Erie are held by certain brokers for a rise, and the probability is that they will get up another move nent. The tendency of prices to-day was upwards, and as there are more buyers than sellers, and some very heavy buyers waiting for a good opportunity to come in, the chances are decidedly in favor of higher prices at a not distant day. It is, however, possible, that in the meantime lower rates may rule. In the present state of finances it may not be considered advisable to come in at prices now current, and buyers may wait for a decline.

After the adjournment of the Board the following

sales of stocks and bonds were made at auction, by A. H. Nicolay:-

and the state of t

a semi-annual dividend of five per cent. At the second board the amount of business trans-acted was unusually limited. Michigan Southern advanced i per cent. New York Central R. R. sold at 884 per cent, dividend off. After the board, stocks generally were a little lower, but there was no stock pressing for sale.

The Southern Michigan Railroad Company earned about \$14,000 more in the first two weeks of July this year than in the same weeks last year.

The earnings of the Great Western (Canada) Railroad for the week ending July 25, were \$40,688 34, against \$29,887 31 for the same week last year. The total receipts from February 1, this year, were \$1,375,094 81, against \$973,961 44 for the same time last year.

The Milwaukie American, of the 28th inst., gives the following comparative movement of wheat at

ago we were over 200,000 bushels behind last year in shipment, we still are at the present date nearly up to last year's figures, and shall pass them before the first of September. We have glorious news from all parts of Wisconsin regarding the great abundance and extraordinary excellence of the ingathering crops. There are no exceptions and no condidions-the thing is settled. The winter wheat, now nearly all secured in good condition, without a drop of rain, is both heavy and excellent. The berry is clean, clear, plump and flinty. We have never known it exceeded. Within the next two weeks the first of it will come to market, though the bulk will not begin to go forward until the first of

Satterthwaite's London Circular by the Arabia,

tinues to be a good demand for American securities for investment, and purchases have been made at an advance upon last week's quotations. The various bonds of the Erie Railroad are justly growing more and more in favor, those due 1883 have been done in fair amounts, from 90 to 91, and Siinking Fund from 87 to 88. The Convertible bonds, 1862, are very scarce and in good demand. There have been numerous transactions in Michigan Southern stock and Sinking Fund bonds, the prices for the former being 92 to 9g, with dividend just declared, and for the latter 79 to 81, carrying accrued interest.

The Common Council of Syracuse, on Monday night, by a two-third vote passed the resolution which had been vetoed by his Honor the Mayor, granting a right of way through the city to the New York, Binghamton and Oswego Railroad. The last annual report of the Norwich and Wor-

cester Railroad Company shows that the receipts for the year ending May 31, 1856, were \$310,113, from

from the suspension of business caused by the closing of the Sound for more than one mouth during the winter; the decrease in the month of February alone, as compared with the same month of 1855, being upwards of \$7,000.

The expenses of operating the road have not been

diminished the past year, though the price of fuel has been materially lessened and a great saving made in oil. The pay roll has been increased \$4,888 42, from the necessity of additional labor and the demand for increased wages. This, with the disbursements of an extraordinary character, including new iron, has increased the expenditures \$13,166 31 over that of the previous year.

There have been added to the equipments during the same period new cars, the cost of which is \$10, 234 06, and motive power \$7,000, and the extraordinary repairs of the road have amounted to \$12.

The company has a further liability in bonds issued to the Norwich and New London Steamboat Company of \$50,000, for which that company has

given ample security, payable one half in 1857, and the balance in 1858, with semi-annual interest. The company is further liable for a debt of Welcome Farnum for \$62,000, and for which it holds an equal amount of the stock of the Providence and

Worcester Railroad Company.

The company has prepared, but not issued, \$150,000 of seven per cent bonds, which the Board had hoped before this time to sell, and from the proceeds of the same restore the earnings heretofore used in the redemption of debt and construction, and pay the scrip issued in July last for the dividend then declared; but the state of the money market has not been such as to enable them to do so.

The increase of business the past year on the through trains running in connection with the steamboats between New York and Boston, and the advance in the fares and prices of freight generally, gives good hope that the company will soon ra-pidly advance its net receipts to a point which will

enable them to resume cash dividends on the stock. A correspondent of the Chicago Democrat furnishes that paper with the annexed statement of the gress earnings per mile of several prominent rail, roads in Illinois, during the month of June, of the

present and past year:-	
The number of miles run by the Galena and Chicag	ţo.

In our advertising columns will be found the programme of the Allentown Railroad—a road which is proposed to fill the only interval now existing in an air line communication from New York to the West. It is believed to be to New York the most important forty miles of road yet unbuilt on the map of the United States. Forty miles taken out of the Erie canal would make a hardly more important gap in our Northwestern communication than the absence of the road now projected makes in our transit to the cities of Cincianati, St. Louis, Cleve-land, Chicago, and all their connections and depenencies. The Allentown Railroad built, and we shall be 128 miles pearer to Cincinnati; 183 miles nearer to St. Louis; 72 miles nearer to Cleveland, and 72 miles nearer to Chicago than by the nearest of the routes now travelled. We shall have the means of sending a locked car, loaded with goods. direct from Jersey City to at least two points on the Missouri river, in the State of Iowa, (on the roads now in process of construction,) and to all intermediate points of importance. We shall be able to send a loaded car from Jersey City direct to Baltimore without transhipment or delay. It is a road, however, that will be available at all seasons of the year, and give New York in more or Philadelphia. The enterprise is in the hands of men who will push it to a successful ter-

the extent of their individual interests towards the construction of this important road. We would, therefore, call their especial attention to the details of cost and probable revenue, which will be found in another column of this morning's impression.

The Allentown Railroad forms the only unfinished lini he direct cast and west railroad route across New Jer "ennsylvania, &c., to which the people of New York an he West have long been looking with anxiety; it extends he town of Allentown, upon the Lehigh Valley Railroad in operation), to Auburn, the eastern terminus of the Dau and Susquebanna Railroad (also in operation), and comm cates there with the southern antiractic coal field of Sch till county, Pa., and at Dauphin with the Pennsylvania Food.

in operation), to Auburn, the eastern terminus of the Dauphin and Susquehanna Railroad (also in operation), and communicates there with the southern anthracite coal field of Schuyi-till county, Pa., and at Dauphin with the Pennsylvania Railroad.

The distance is 32½ miles. The grades, coming towards New York, will not exceed twolve feet to the mile.

This route completes the connection between the railroads now in operation from the city of New York and the Pennsylvania Central Railroad, which it joins near the town of Dauphin, eight miles north of Harrisburg, and avails of all the vast connections of that prosperous enterprise. The legislation is all complete, the line has been carefully surveyed and accurately located, and nothing now remains to prevent the immediate commencement of the work.

To construct this railroad with a single track and sidings will cost \$1,90,000, exclusive of the right of way (a large portion of which will be taken in stock) and of the equipment.

If forms, with its connections, the most direct railroad route that can ever be obtained between the city of New York and the principal commercial emporia of the Western States, much shorter than say other, and a cheaper line of trausportarous a country but little obstracted by the winter snows that embarrass so much sorter than say other, and a cheaper line of trausportarosa of country but little obstracted by the winter snows that embarrass so much sorter than say other, and a cheaper line of trausportarosa of country but little obstracted by the winter snows that embarrass so much sorter than say other, and a cheaper line of trausportary of little part of the head of matgation on the Church and the condition of the New Jersey, crosses the Delaware river by a substantial bridge near faston, Pennsylvania, and he Contral Railroad, Arc Pennsylvania, and the Church and Chicago Railroad and its great net-work of branches, and nailroad with good fire to the church of the shortest rout to Chicago Railroad and its great net-work of branches, and

which is only to be round in quantity region.

Finally, it may be stated that the combined line opened to the city of New York by the Allentown Railroad will be shorter than the present travelled router, as follows.—
